AWS DevOps Engineer | Docker | Kubernetes | Jenkins | Terraform | Ansible | CI/CD | Linux | Git | ELK | Azure | GCP

PROFESSIONAL SUMMARY

AWS DevOps Engineer with 2+ years of experience in automating cloud infrastructure, building CI/CD pipelines, and orchestrating containers. Skilled in AWS (EC2, VPC, S3, IAM, RDS, ALB, Auto Scaling), Jenkins, Git, Docker, Kubernetes (EKS), Terraform, and Linux, with hands-on expertise in Infrastructure as Code. Proven ability to design scalable systems, implement robust pipelines, monitor with CloudWatch, Prometheus, Grafana, and ELK, and enhance the reliability, performance, and security of applications.

TECHNICAL SKILLS

Cloud: AWS (EC2, VPC, S3, IAM, RDS, cloudWatch, ALB, Auto Scaling)
CI/CD: Jenkins, Git, GitHub, Maven, Nexus
Containers & Orchestration: Docker, Kubernetes (EKS), Docker Compose
Infrastructure as Code: Terraform, CloudFormation (Basic)
Configuration Management: Ansible
Scripting: Bash / Shell, Python
Monitoring & Logging: CloudWatch, Logs & Alerts, Grafana, ELK stack, Prometheus
Operating System: Linux (Ubuntu)
Networking: VPC, Subnets, NAT, Network ACLs, Routing, Load Balancers, DNS

PROFESSIONAL EXPERIENCE

DevOps Engineer – Client Project (Abrigo) | January 2024 – Present

- Designed and executed Jenkins CI/CD pipelines integrating GitHub and Maven, reducing manual deployment effort by 40%.
- Systematized AWS infrastructure provisioning using Terraform modules and Ansible for faster, consistent environment setup.
- Deployed and managed Docker containers, orchestrating microservices on Kubernetes (EKS).
- Configured CloudWatch alarms for EC2, RDS, and S3, proactively reducing downtime incidents.
- Applied S3 bucket policies and lifecycle rules, optimising storage costs by 20%.
- Built and deployed Java applications on Apache Tomcat via Jenkins pipelines.
- Enforced secure VPC architecture with subnets, NAT gateways, and security groups for high availability and compliance.
- Integrated Nexus repository manager for artifact management and dependency resolution.
- Maintained high availability using EC2 Auto Scaling groups.

PROJECTS

High-Availability 3-Tier Architecture on AWS

- Architected 3-tier architecture using **VPC, EC2, RDS, ALB, Auto Scaling**
- Implemented private RDS with Multi AZ, backups, and monitoring
- Enforced IAM least privilege and **CloudWatch** dashboards
- Provisioned infrastructure using **Terraform**

End-to-End DevOps Automation

- Automated **CI/CD** using Jenkins pipelines
- Build optimised Docker images and deploy on Kubernetes
- Managed Kubernetes Deployments, Services, Secrets, and HPA
- Resolved **Terraform state** issues, Jenkins failures, Kubernetes crash loops, and IAM permission errors

EDUCATION

Shivalik College Of Engineering, Dehradun
Bachelor of Technology in Electrical & Electronic Engineering 73% 2023
Diploma in Electrical Engineering 76% 2020
