GCP DevOps Engineer | Docker | Kubernetes | Jenkins | Terraform | Ansible | CI/CD | Linux | Git | ELK | Azure | AWS

PROFESSIONAL SUMMARY

GCP DevOps Engineer with **2+ years of hands-on experience** in automating cloud infrastructure, building CI/CD pipelines, and managing containerized applications. Skilled in **Google Cloud Platform (Compute Engine, VPC, Cloud Storage, IAM, Load Balancing)**, **Kubernetes (GKE)**, Jenkins, Docker, Terraform, and Linux. Experienced in implementing Infrastructure as Code, configuring CI/CD pipelines, and monitoring systems using **GCP Cloud Monitoring, Prometheus, Grafana, and ELK** to improve reliability, performance, and security.

TECHNICAL SKILLS

Cloud: Compute Engine, VPC, Cloud Storage, IAM, Load Balancer, Cloud Monitoring, Cloud Logging AWS (EC2, VPC, S3, IAM, RDS, cloudWatch, ALB, Auto Scaling)
CI/CD: Jenkins, Git, GitHub, Maven, Nexus
Containers & Orchestration: Docker, Kubernetes (GKS/EKS), Docker Compose
Infrastructure as Code: Terraform, CloudFormation (Basic)
Configuration Management: Ansible
Scripting: Bash / Shell, Python
Monitoring & Logging: GCP Cloud Monitoring & Logging & Alerts, Grafana, ELK stack, Prometheus
Operating System: Linux (Ubuntu)
Networking: VPC, Subnets, Firewall Rules, NAT, Load Balancers, DNS

PROFESSIONAL EXPERIENCE

DevOps Engineer – Client Project (Abrigo) | January 2024 – Present

- Designed and implemented **Jenkins CI/CD pipelines** integrating GitHub and Maven, reducing manual deployment effort by **40%**.
- Provisioned and managed **GCP infrastructure using Terraform** for consistent environment setup.
- Deployed and managed Docker containers and orchestrated workloads on **Kubernetes (GKE)**.
- Configured **GCP Cloud Monitoring alerts** to proactively identify and resolve issues.
- Implemented **Cloud Storage lifecycle policies** to optimize storage usage.
- Built and deployed Java applications using Jenkins pipelines and Apache Tomcat.
- Designed secure **GCP VPC architectures** with subnets, firewall rules, and load balancing.
- Integrated **Nexus** for artifact management and dependency control.

PROJECTS

High-Availability 3-Tier Architecture on AWS

- Architected 3-tier architecture using **VPC, EC2, RDS, ALB, Auto Scaling**
- Designed a 3-tier architecture using **VPC, Compute Engine, Cloud Load Balancer, and Cloud SQL**
- Implemented monitoring, backups, and IAM least-privilege access
- Provisioned infrastructure using **Terraform**

End-to-End DevOps Automation

- Automated **CI/CD** using Jenkins pipelines
- Build optimised Docker images and deploy on Kubernetes
- Managed Kubernetes Deployments, Services, Secrets, and HPA
- Resolved **Terraform state** issues, Jenkins failures, Kubernetes crash loops, and IAM permission errors

EDUCATION

Shivalik College Of Engineering, Dehradun
Bachelor of Technology in Electrical & Electronic Engineering 73% 2023
Diploma in Electrical Engineering 76% 2020
